Design Systems & Design Patterns

WORK EXPERIENCE

FullStack Software Developer • ONLEAN
Mar 2024 → Actually   Barcelona, Spain (Remote)

- 2024 – 2025:
  - Focused on the development and maintenance of the company's main application, app.onlean.com, a website designed to manage the physical security of companies.
  - Collaborated on improving functionality, performance, and user experience.
- Technologies used:
  - Frontend: React, Next.js, JavaScript, HTML, CSS, TailwindCSS.
  - Backend: Node.js, Express.
- Notable clients:
  - The application was utilized by companies such as BASF España and ASPY.

FullStack Software Developer • Grup Oliva Motor
Aug 2023 → Mar 2024   Tarragona, Spain (On-site)

- 2023 – 2024:
  - Engaged in internal projects for the company within the automotive sector.
  - Worked on the company's e-commerce platform, focusing on SEO optimization and leveraging Algolia (via its API) for inventory management and Strapi for content management.
  - Contributed to the development of the company's intranet to manage vehicle appraisal processes.
- APIs used:
  - Algolia API: Used extensively for real-time inventory search and management.
- Technologies used:
  - Frontend: React, Next.js, HTML, CSS, TailwindCSS.
  - Backend: Node.js, Express.
  - Other tools: Algolia, Strapi.
- Published projects:
  - gomotor.com
  - grupolivamotor.com
  - car4cash.es

Junior Developer / Full Stack Developer • Movertis
Feb 2019 → May 2023   Tarragona, Spain (On-site / Hybrid)

- 2019:
  - Collaborated directly with clients to develop websites using PHP.
  - Worked on applications using JavaScript.
- 2020:
  - Adopted a new work methodology.
  - Developed applications with Angular (frontend) and Express/Nest.js (backend).
- 2021:
  - Began performing basic DevOps tasks using tools like Jenkins.
- 2022-2023:
  - Continued developing websites and applications with Angular.
  - Migrated applications from Cordova to Capacitor to enhance compatibility and performance.
  - In 2023, started a project using React and Next.js to improve SEO, productivity, and performance.
- General responsibilities over 4 years:
  - Managed internal projects and projects involving direct client interaction.
  - Provided technological services related to fleet vehicle geolocation systems.
- APIs used:
  - Wialon API: Frequent usage for real-time extraction of vehicle tachograph data.
  - Google Maps API: Developed optimized real-time routing solutions.
  - Capacitor Background Geolocation: Extensively used for implementing real-time background location tracking.
- Technologies used:
  - Frontend: Angular, React, Next.js, Ionic Angular, TypeScript, HTML, CSS.
  - Backend: PHP, Node.js, Express, Nest.js.
  - Databases: MongoDB, MySQL.
  - Tools and others: Docker, Kubernetes (K8s), Capacitor, Jenkins.
- Key clients and companies:
  - Developed applications for notable companies such as Cemex, Heidelberg Cement Hispania, Secomsa, and Xerox.
